Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       33 ; Search time 425.19 Seconds

Macrophage-derived inflamatory cytokine MIP-2 used for developing screening assays, for prodn. of antibodies and in diagnosis and therapy.

Claim 5; Fig 7; 78pp; English.

MIP-2 may be used to detect idiopathic or invasive stimuli.

Antibodies raised to the cytokine may be used to measure MIP-2 activity and inhibit the production of MIP-2 used in treatment inflamation or fever.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Mus

Cloned Heymann nephritis antigen , gp330, gene used for diagnosis and in treatment of membranous glomerulonephritis, wounds and gastric ulcers. Disclosure; p; English.

The gene can be used to transform a host cell providing derivatives, free from impurities.

Fig. 9; 20 pp; English.

The sequence is isolated from male goats and hybridises only to the DNA of cattle, sheep, goats and other ruminants which contain Y-chromosomal DNA. It can be used for sex determination.

Sequence 448 BP; 132 A; 104 C; 103 G; 109 T;

The claimed sequence is nucleorides 14-532. The TNF beta gene can be easily modified due to the restriction sites. The gene can be easily modified due to the into an expression system, eg mammalian cells, yeast and insect hosts. The gene is produced synthetically.

The lymphotoxin is useful as an antitumour agent. It is not only cytotoxic to various cancer cells but is also capable of intensifying the cytotoxic activity of certain anticancer agents or interferons. It can be produced in pure form and is stable against degradation during purification and storage. See also N93191, and P93717.

Early growth regulatory proteins of mouse and human fingers, vectors and DNA sequence encoding the protein of detecting each.

Claim 8; fig. 1.1-1.8; 55pp; English.

Claim 8; fig. 1.1-1.8; 55pp; English.

The sequence is that of the OC3.1 clone contg. the mousequence which has DNA-binding zinc fingers.

New recombinant kallikrein polypeptide(s) and encoding DNA useful as vasodilators and for treating male infertility.
Table IV; page 11; 43pp; English.
The monkey kallikrein gene is 93% homologous to that of the human genomic kallikrein gene. See also P92314, N93194, N93195, N93193, N93197, N93198, P93720, P93721, and P93722.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       page 11; 29pp; English.

The lymphotoxin is useful as an antitumour agent. It is not only cytostatic to various cancer cells but is also capable of intensifying the cytotoxic activity of certain anticancer agents or interferon. It can be produced in pure form and is stable against degradation during purification and storage. See also N91469, and p93717.

This clone encodes the complete mature human Protein S. To facilitate expression in mammalian cells it is fused to the leader sequence of bovine cDNA. See also NB1441.

No.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Score
